SECTION 9 (1)

BY 
EXECUTIVE DIRECTOR

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.1 General

B103.1.1 Regulations

A. Methods Of Applying Rates

1. Additional point of termination of a Local Channel in Different Buildings on the Same Premises.

(Obsoleted 01-01-87), Type B; Tariff Reference Section B3.)

- a. A charge, as provided in B103.1.1.A.1.b. following, for extending a Local Channel and terminating the channel at a station location in a different building on the same premises shall apply in lieu of an additional Local Channel Charge when conditions and facilities permit, otherwise the local channel charge applies.
- b. When additional points of termination of a single private line service are located in different buildings on the same premises, the charge for the channel shall be based on the airline distance between each pair of buildings as specified in Section B103. following.

2. Additional Point of Termination in the Same Building

(Obsoleted 01-01-87), Type B; Tariff Reference Section B3.)

A charge as provided in B103.2. and B103.3. following for extending a Local Channel and terminating the channel at a station location in the same building applies in lieu of an additional local channel charge.

3. Same Building

(Obsoleted 01-01-87, Type D; available *solely at the discretion of the Company for new service, additions, or transfer of service where spare capacity is available in existing cable facilities.*) (C)

When all station locations of a private line service are in the same building, the charge for same building charges as specified in Section B103. following apply.

4. Channels Between Buildings on the Same Premises

(Obsoleted 01-01-87, Type D; available *solely at the discretion of the Company for new service, additions, or transfer of service where spare capacity is available in existing cable facilities.*) (C)

When station locations of a private line service are located in different buildings on the same premises the charge for the channel shall be based on the airline distance between each pair of buildings when conditions and facilities permit. The charges are as specified in Section B103. following. For channels routed via the central office the charge is as stated in B3.1.1.G.2.a. preceding.

Where a supporting structure is necessary for the purpose of furnishing extension lines on the subscriber's premises, such supporting structure will be furnished by the subscriber as provided for "Construction on Private Property" in Section A5.

When the channel facility (wire or cable) is of sufficient length and/or the in-plant cost of circuit (wire or cable) facility renders the monthly rate inadequate, the customer may be required to pay a monthly rate of 3-1/4 percent of the in-plant cost of the facilities placed.

If the Company considers it appropriate and compensatory, existing facilities may be rated at 3-1/4 percent of the in-plant cost of the facilities to determine a monthly rate. The facilities may be offered for sale to the customer.

B. Continuous Property Channels

1. New channels between points on the same customer's continuous property are provided at the sole discretion of the Company and only where spare capacity is available in existing facilities. (N)
2. A Continuous Property Channel consists of one pair (half duplex) or two pairs (full duplex) of metallic conductors with the physical and electrical transmission characteristics inherent to the existing facility. Equipment that is required to improve or alter the transmission characteristics of the channel is the responsibility of the customer and must be connected on the customer's side of the network interface. The customer may not access or alter a Continuous Property Channel in mid-span; nor install any equipment which results in harm to the facility or other channels within the cable or wire facility. (N)

B103.1 General (Cont'd)

B103.1.1 Regulations (Cont'd)

B. Continuous Property Channels (Cont'd)

3. Subject to A. preceding, when twenty five or more half duplex channels are required between the same two points, the Company will consider a bulk provisioning arrangement whereby the subscriber can lease channels in multiples of twenty five channels. With bulk provisioning arrangements, no subsequent recurring or nonrecurring charges apply as channels are activated by the subscriber. Rates for bulk provisioning arrangements are determined on a Special Arrangement Basis, See Section B5. (N)
4. Continuous Property Channels will be discontinued when associated cable facilities can no longer be economically maintained. (N)

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.2 Description Of Services And Rates - Intraexchange

B103.2.1 Series 1100 - Sub Voice Grade Service

- A. The following types of Sub Voice Grade Services are designed for transmission of low speed data at speeds up to 75 and up to 150 baud within certain technical specifications. These channels are furnished for half duplex and duplex operation for use with two-point or multi-point Private Line Services. The service is not suitable for the transmission of alternating current tones. Effective 8-31-85, Obsolete Type B, not available for new installations, additions or on transfers of service to new location.
- B. The types of local channel and the transmission characteristics offered for termination at a premises for termination in customer-provided terminal equipment and systems are as follows:

1. Type 1150

A four-wire interface engineered for binary signals at rates up to 75 baud, 20 or 62.5 milliamperes dc neutral signals. The terminal equipment with a transmitted output of no more than 8 percent telegraph distortion local and capable of processing received data signals with up to 35 percent telegraph distortion.

The Company has the option of providing 20 or 62.5 milliamperes and will notify the customer of the current level to be supplied. The Company will supply the line voltage and provide for the current adjustment. The maximum open circuit voltage across the send data leads at the interface will not exceed 270 volts.

2. Type 1151

EIA Standard RS232B type interface engineered for binary signals at rates up to 150 baud and the terminal equipment with a transmitted output of not more than 5 percent telegraph distortion and capable of processing received data signals with up to 40 percent telegraph distortion.

- C. Parameters and Specifications for Sub Voice Grade Local Channels used with Customer Provided Station Equipment (CPE) is discussed in B103.2.1.B. The following type specifications apply.

1. Basic Parameters With Specification Or Limit

a. Channel Signals

Local Channels used with CPE - as specified in B103.2.1.B. Note that the specifications of channel signals refer to the requirement of the total service offering and not the individual local channel.

b. Channel Distortion

Local Channels used with CPE - as specified in B103.2.1.B. Note that the specifications for channel distortion refer to the requirement of the total service offering and not the individual local channel.

c. Power Requirement

For up to 75 Baud Type - Where the Company provides transmission equipment at the interface. The customer must provide a source of continuous 117 volt, 60 Hz ac power by means of a nonswitched outlet.

For up to 150 Baud - Customer must in all cases provide a source of continuous 117 volt, 60 Hz ac power, nonswitched outlet.

The Company will in all cases supply all voltage and current adjustments.

These channels are not suitable for the transmission of alternating current tones.

F. Local Area Data Channels

(Obsoleted 10-26-87, Type B) In consideration of the decreasing supply of metallic facilities required to provide Local Area Data Channels, the Company will convert a customer's service requiring such facilities to a Voice Grade Service or BellSouth Synchronet service and waive the nonrecurring charges associated with the change. This applies to customers where metallic facilities are being replaced with non-metallic facilities, or a customer may elect to make this change at any time prior to a modernization program that would eliminate the availability of metallic facilities.

Local Area Data Channels are intended for baseband transmission of digital data signals between two points on the same premises or between two different premises within the same serving wire center area not to exceed six (6) cable route miles.

- The rates and charges specified for Local Area Data Channels provide for the furnishing of service when suitable facilities are available. When special construction is necessary to provide these channels a charge based on the cost incurred will apply in addition to the rates and charges for the channels.
- Transmission specifications for local area data channels are dependent upon the route length of the facilities utilized to provide the service as follows:

Maximum End-To-End Facility Length In Route Miles	Maximum Insertion Loss At 1000 Hz. In dB ²
1	9.0
2	13.5
3	17.0
4	20.0
5	23.0
6	25.5

- Type 1180 is provided as a 2-wire interface with effective 2-wire facilities.
- Type 1182 is provided as a 4-wire interface with effective 4-wire facilities.

B103.2.2 Series 2000 - Voice Grade Service

A. Dataphone Select-A-Station Service

(Obsoleted June 21, 1996, Type D; Unit no longer being manufactured. Not available for new installations or transfers of service. Offered for additions or moves only as obtainable from existing stock.)

Dataphone[®] Select-A-Station Service is a multistation, voice grade private line data system designed to establish point-to-point connections rapidly between a master station and a number of remote stations one at a time. Direct transmission between remote stations is not possible, nor is simultaneous communications from the master to more than one remote station possible.

1. Regulations

The regulations specified herein are in addition to the regulations contained in Section B2. of this Tariff.

- Dataphone[®] Select-A-Station Service requires the use of equipment as described in B103.2.2.B.2 following and type 2261 or 2462 voice grade local channels as described in B3.2.2.C.
 - The Company will furnish, subject to availability of facilities, Dataphone[®] Select-A-Station Service channels suitable for voice grade data transmission.
 - Dataphone[®] Select-A-Station channels are not provided for alternate voice-data transmission or DC continuity.
 - The customer shall provide terminal equipment in accordance with interface specifications as described in Technical Reference PUB 41014, "Data Communications Using Dataphone[®] Select-A-Station Service."
- A Primary Data Station Selector, PDSS, provides the connection between the master station and any one of up to 128 (125 for addressable operations) two-wire or four-wire voice grade data channels. Where more than one DSS is required, the DSS that is directly connected to the master station (SCU) is termed the Primary Data Station Selector (PDSS). Additional DSS's designated Secondary Data Station Selectors (SDSS) connected to the PDSS, may be provided.
 - A Selector Control Unit, SCU, will be provided at the master station location. The SCU is used by the customer to transmit control and/or address signals to the DSS's and to receive supervisory signals from DSS's.
 - Dataphone[®] Select-A-Station Service arranged for the sequential mode of operation requires customer specification, prior to installation, of the order of connections from the DSS to the remote stations. The customer also must specify one of the following three DSS options to accommodate customer operating procedures and circuit structure:

Note 1: The Installation Charge is per channel.

Note 2: Rates are effective with billing cycles normal beginning on or after May 22, 2004.

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.2 Description Of Services And Rates - Intraexchange (Cont'd)

B103.2.2 Series 2000 - Voice Grade Service (Cont'd)

A. Dataphone^{*} Select-A-Station Service (Cont'd)

- a. Automatic Step¹
A DSS option in which the duration and order of connections are fixed.
 - b. Automatic Step with Reset¹
A DSS option in which the duration and order of connections are fixed, but the DSS will reset to the beginning of the connection cycle upon command from the master station.
 - c. Controlled Step
A DSS option which allows the customer to have in-service control over the duration of the connection. However, the order of connections is fixed.
5. Dataphone^{*} Select-A-Station Service arranged for addressable operation provides for the duration and order of connections to be variables, controlled by the master station.
 6. Access from the PDSS to the SCU is obtained through a Type 2462 local channel. PDSSs located outside of the serving wire center where the SCU is located will require voice grade interoffice channels at charges as contained in B3.4.3. of this Tariff.
 7. Access to each remote station from the DSS is obtained through a Type 2261 or 2462 local channel. Remote stations located outside of the serving wire center where the DSS is located will require voice grade interoffice channels at charges as contained in B3.4.3. of this Tariff.
 8. Access to each SDSS from the PDSS is obtained through a Type 2261 or 2462 local channel. A SDSS located outside of the serving wire center where the PDSS is located will require voice grade interoffice channels at charges as contained in B3.4.3. of this Tariff.

B. Rates and Charges

1. Intraexchange - Same Continuous Property Different and Same Building Channels

- a. Each additional point of termination of a local channel in a different building on the same premises
(Obsoleted 01-01-87, Type B; Tariff Reference Section B3.)

(1) Charges

	Monthly Rate ²	USOC	
(a) Per 1/4 mile or fraction thereof	\$ 3.50	1LM+G	(1)
(b) Minimum Charge	6.98	NA	(1)

- b. Each additional point of termination of a local channel
(Obsoleted 01-01-87, Type B; Tariff Reference Section B3.)

(1) In the same building

- (a) Charge 6.98 2SE++ (1)

Note 1: A DSS optioned for automatic step or automatic step with reset cannot be connected to a secondary DSS.

Note 2: Rates are effective with normal billing cycles beginning on or after **May 22, 2004.** (C)

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.3 Description Of Service And Rates - Interexchange (Cont'd)

B103.3.1 Series 1000 - Sub Voice Grade Service (Cont'd)

- B.** The types of local channels and the transmission characteristics offered for termination at a premises for termination in customer-provided terminal equipment and systems are as follows.

1. Type 1050

A four wire interface engineered for binary signals at rates up to 75 baud, 20 or 62.5 milliamperes dc neutral signals. The terminal equipment with a transmitted output of no more than 8 percent telegraph distortion local and capable of processing received data signals with up to 35 percent telegraph distortion.

The Company has the option of providing 20 or 62.5 milliamperes and will notify the customer of the current level to be supplied. The Company will supply the line voltage and provide for the current adjustment. The maximum open circuit voltage across the send data leads at the interface will not exceed 270 volts.

2. Type 1051

EIA Standard RS232B type interface engineered for binary signals at rates up to 150 baud and the terminal equipment with a transmitted output of not more than 5 percent telegraph distortion and capable of processing received data signals with up to 40 percent telegraph distortion.

- C.** Parameters and Specifications for Sub Voice Grade Local Channels used with Customer Provided Station Equipment (CPE) is discussed in B103.3.1.B. The following type specifications apply.

1. Basic Parameters With Specification Or Limit

a. Channel Signals

Local Channels used with CPE - as specified in B103.2.1.B. Note that the specifications of channel signals refer to the requirement of the total service offering and not the individual local channel.

b. Channel Distortion

Local Channels used with CPE - as specified in B103.3.1.B. Note that the specifications for channel distortion refer to the requirement of the total service offering and not the individual local channel.

c. Power Requirement

For up to 75 Baud Type - Where the Company provides transmission equipment at the interface. The customer must provide a source of continuous 117 volt, 60 Hz ac power by means of a nonswitched outlet.

For up to 150 baud - customer must in all cases provide a source of continuous 117 volt, 60 Hz ac power, nonswitched outlet.

The Company will in all cases supply all voltage and current adjustments.

These channels are not suitable for the transmission of alternating current tones.

B103.6 Series 10000 Channels (Entrance Facilities)

(Obsoleted 02-15-90, Type D; not available for new installations, moves or transfers. Existing customers may add channels only to the extent that they are available.)

A. Types and Description

Series 10000 channels are furnished to the customer by the Company for the purpose of extending customer-provided communications systems to a premises of the customer or authorized user. Centrex Type Services Switching Equipment serving the premises of the customer or authorized user for use at such premises. Channels are furnished for half-duplex or duplex operation on a two-point basis for service 7 days per week, 24 hours per day, for a minimum period of one month.

Type 10001 - Approximate bandwidth of 300 - 3000 cycles per second. Furnished, to the extent permitted by the normal transmission characteristics of this grade of channel, for types of transmission similar to those set forth for Series 1000 and 2000 channels.

B. Regulations

In addition to the regulations set forth in Section B2., the following regulations apply to Series 10000 channels as specified following:

Type 10001 - The customer's or authorized user's premises must be located 25 airline miles or less from the point at which the customer-provided communication channel is connected to the Company entrance facility.

C. Rates - Monthly Service

Type 10001

(Rates for entrance facilities will be based on the costs incurred on a case-by-case basis.)

Note 1: Rates are effective with normal billing cycles beginning on or after May 22, 2004.

B103.9 Reserved For Future Use

(N)

B103.10 Description Of Service And Rates - Customer Operating Center Service (COC)

(M)

Obsoleted 02-15-90. Type D; customers may continue to activate channels within their existing size of service cable.

(N)

B103.10.1 General

(M)

- A. Customer Operating Center Service (COC) is designed for use by customers who utilize large, dedicated quantities of local channels of the types described in B103.10.1.K.2. following between their location and the serving wire center. (M)
- B. Customer Operating Center Service is provided to customers at their option. The rates for COC service are billed directly by the Company to the customer of COC service. (M)
- C. For the purposes of this Tariff, a Customer Operating Center is defined as a customer location: (M)
 1. owned or leased by the customer over which the customer has control and provides security. (M)
 2. from which the customer furnishes and administers services to multiple clients in a geographical area. The term "Patron" denotes a subscriber to the services offered by the owner or lessee of a Customer Operating Center. (M)
 3. at which a system, or a group of systems, owned or leased by the customer whose operation is to receive signals and messages which are recorded, maintained, and supervised by the customer. (M)
 4. at which the customer has regularly scheduled observers and operators and/or equipment in attendance at all times which, upon receipt of a signal or message from a patron take such action as shall be required under the rules established by the customer for their/its guidance. (M)

PURSUANT TO KRS 100.011,
SECTION 9.11)
BY: *[Signature]*
PUBLIC SERVICE COMMISSION

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

B103.10 Description Of Service And Rates - Customer Operating Center Service (COC) (Cont'd)

B103.10.1 General (Cont'd)

- D. COC service is provided by using a complement of cable pairs in the size and length specified in B103.10.1.K.1. following.
- E. A monthly rate applies for each complement of cable pairs of a specific size whose airline distance is 2/4 mile or more.
- F. The customer will provide in advance a forecast of the complement of cable pairs he wishes to have planned for his use and agrees to payment of the charges for the complement of cable pairs whose airline distance is 2/4 mile or more whether circuits are activated or not.
- G. The monthly rate for each complement of cable pairs is based on the airline distance between the customer's operating center and its normal serving wire center. The maximum distance for COC service is one and a quarter mile.
- H. In addition to the monthly rate for the complement of cable pairs, a monthly rate applies for each local channel activated within the complement of cable pairs.
- I. Basic Termination Liability

A basic termination liability will apply for any *facility* placed new specifically for a customer for which no reuse is foreseen if the initial use is discontinued. (T)

The termination liability period is 5 years.

The amount of the termination liability is equal to the estimated amount for:

1. Cost of the installed facilities provided including costs incurred for rearrangements of existing facilities and/or construction of new facilities as appropriate, less net salvage. Installed cost includes the cost of:
 - a. equipment and materials provided or used,
 - b. engineering, labor and supervision,
 - c. transportation,
 - d. rights of way.
 2. Any other costs associated with the particular situation.
 3. The termination liability defined preceding is reduced by 1/60th for each month of a 5 year period that the complement of cable pairs is in service from the date it is placed in service for a specific customer.
- J. A service charge applies for a connection move or change of each local channel activated within the complement of cable pairs. The service charges are as specified in B103.10.1.L.1.e. following.
- K. Monthly Rates
1. Per complement of cable pairs

L. Nonrecurring Charges

1. Service Charge Per Local Channel Activated

The service charge for the connection or change of each local channel activated within a complement of cable pairs is as follows:

a. The term Service Charge as specified herein is defined as the nonrecurring charge or charges applying to the ordering, installing, rearranging and furnishing of channels for extension lines. Service charges are categorized as:

- (1) Service Ordering Charge
- (2) Visit Charge
- (3) Channel Connecting Charge

b. Service Ordering Charge

- (1) The Service Ordering Charge applies per customer request for work performed by the Company in connection with the receiving, recording and processing the customer's request for local channels to be installed at the same time.

Note 1: These local channels are provided with a four-wire facility (2 pairs). The total number of all types of local channels that may be activated within a complement of cable pairs is limited by the number of these types of local channels.

Note 2: Rates are effective with normal billing cycles beginning on or after **May 22, 2004**.

B103. OBSOLETE SERVICE OFFERINGS - CHANNELS

**B103.10 Description Of Service And Rates - Customer Operating Center Service (COC)
(Cont'd)**

B103.10.1 General (Cont'd)

L. Nonrecurring Charges (Cont'd)

1. Service Charge Per Local Channel Activated (Cont'd)

b. Service Ordering Charge (Cont'd)

- (2) The term "per customer request" as specified preceding means all work or service ordered by the customer to be performed or provided at the same time. Only one service ordering charge applies when more than one local channel or types of local channels is ordered at the same time. When two or more types of local channels are ordered on the same customer request the higher charge applies.

c. Visit Charge

A Visit Charge applies for connecting or changing Types 2463, 2464, and 2230 local channel only. Only one Visit Charge applies when more than one Type Local Channel is ordered to be provided at the same time.

d. Channel Connecting Charge

The Channel Connecting Charge covers work associated with activating a local channel in a complement of cable pairs. The charge applies for each channel activated.

e. Schedule of Charges

(1) Service Ordering Charge, per customer request

	Charge ¹	USOC	(T)
(a) Type 1204 and 1205	\$65.78	NA	(I)
(b) Type 2463, 2462 and 2464	221.38	NA	(I)
(c) Type 2230 and 2261	221.38	NA	(I)
